Sage provides the expert guidance you need to harness the full capability of your Sage ERP Accpac solution. As trusted advisors, we take the time to get to know you and ensure you learn from every interaction with us. We'll help show you how your solution can improve business efficiency. Our customer support team provides swift responses for everything from basic fixes and error messages to technically complex issues beyond the experience of your IT department. When you choose a Gold plan, you benefit from an unlimited number of support cases, extended hours, and your calls are placed in the front of the queue.

Collaborative, Web 2.0 Tools and Technologies S G

Knowledge exchange is an important part of Sage's support philosophy. Our goal is to ensure you learn from every interaction you have with us. We invest in the latest support technologies to ensure that knowledge exchange is as smooth and as beneficial to you as possible. For example, with a Silver or Gold plan, when you call our support centers, you can receive remote desktop support, which means the analyst you're talking to sees what you see—enabling him or her to more accurately diagnose the issue and walk you through a solution. Other tools you may find handy include online chat, web-based communities and message boards, and notifications through various social networking websites.

Upgrade Planning Assistance* G

When you choose the Gold plan, Sage support analysts assist you and your authorized Sage business partner during the planning phase of your initial implementation and upgrades. This service includes providing you with best practice tips, review of system requirements, third-party compatibility considerations, pre- and postupgrade recommendations, and troubleshooting.

*Upgrade Planning Assistance is for planning purposes, and excludes customization, report writing, data conversion, and training. Must be coordinated and scheduled in advance with Sage. Sage reserves the right to limit the number of hours.
